#### Visual Scanning Identification (Passing Grade = 85%)

Test 1 of 1  
Test Date: 7/29/2015

This player showed mastery of this test.

This player's average grade was 100%.

This player has demonstrated proficiency for this specific skill.

Additional training in this area is not considered necessary.

#### Selective Comparison Reasoning (Passing Grade = 85%)

Test 1 of 1  
Test Date: 7/29/2015

The Training Recommendations Menu shows you any training recommendations for the player, based on all tests that have been completed. The information in this menu includes the name of each test, the passing grade needed to pass the test, the date each was completed, the average grade achieved, whether or not the player demonstrated mastery of the test as well as corresponding training exercises.

If the player did not show mastery of a test, a set of training exercises will be recommended that the player can benefit from in regards to improving their skills.

**Plan Type:** Simple will place easy exercises in your plan, Standard will place medium exercises, and Advanced will place hard exercises.

**Phase Settings:** There are five phase settings levels: None, Easy, Standard, Hard, and Challenging.

- None: All options are disabled.
- Easy: Audio and Visual Distractions are enabled.
- Standard: All options are enabled with max rate of 75%.
- Hard: Speed Training and Patience are enabled with max rate of 100%.
- Challenging: All options are enabled with max rate of 100% and rate not being able to decrease.

**Update/New:** If you choose Update Current, your Current plan will be updated to add any new exercises in the Recommendations list. You may also choose “Create New” which will erase your current plan and any stage progression you currently have and replace that plan with a new one based on the Current Recommendations list.

The “Create Training Plan” button will automatically create a training plan for the player that will contain the recommended exercises. If you are recommended less than four exercises, then extra recommended exercises will be added to your plan so that you have at least a minimum of four.

The “Print” button takes the results displayed in this menu and displays it in a format that can then be saved, exported to different formats and/or printed.
